ABOUT ME

As a skilled web developer with 5+ years of experience, I have a proven track record of designing and implementing websites that meet client requirements and exceed user expectations. With a strong proficiency in HTML, CSS, JavaScript, and various web development frameworks, I can deliver scalable, responsive, and visually appealing web solutions. I am a dynamic, highly disciplined, and results-oriented individual actively seeking opportunities to demonstrate my capabilities and pursue a rewarding career path in a performance-driven environment. As of now, I am in possession of a visit visa that is valid until December 1, 2023.

WORK EXPERIENCE

Senior WordPress Developer

The Xpertz Web Infusion (SMC-Private) Limited [01/09/2022 – 30/09/2023]

City: Lahore

Country: Pakistan

Website Design and Development:

1. Create visually appealing and user-friendly websites using Elementor and Elementor Pro.
2. Customize and modify WordPress themes to meet client requirements.
3. Ensure responsive design for seamless user experience on various devices.

Content Creation:

1. Use Elementor's drag-and-drop interface to build and edit pages.
2. Add and format text, images, videos, and other multimedia elements.
3. Create custom layouts and templates for blog posts, landing pages, and other content types.

Plugin Integration:

1. Integrate and configure WordPress plugins to enhance website functionality.
2. Ensure compatibility and optimal performance with Elementor.
3. Knowledge of WordPress Plugins

Optimization:

1. Optimize website speed and performance by optimizing Elementor elements.
2. Implement SEO best practices for on-page optimization.

Troubleshooting:

1. Diagnose and resolve issues related to Elementor and Elementor Pro.
2. Debug and fix layout or functionality problems.

Custom Development:

1. Write custom CSS or JavaScript to achieve unique design and functionality.
2. Develop custom widgets and templates using Elementor Pro's developer tools.

Quality Assurance:

1. Conduct thorough testing to ensure cross-browser compatibility and responsiveness.
2. Check for any broken links or functionality issues.

Client Training and Support:

1. Provide training to clients on how to use Elementor for basic content updates.
2. Offer ongoing support and maintenance services for Elementor-based websites.

Collaboration:

1. Work closely with graphic designers and content creators to implement their designs and content into Elementor.
2. Collaborate with other team members to ensure project deadlines are met.

Stay Updated:

1. Keep up-to-date with the latest trends and updates in Elementor and WordPress.
2. Continuously improve skills and knowledge related to Elementor and Elementor Pro.

Documentation:

1. Create documentation for clients on how to manage their websites using Elementor.
2. Maintain records of custom code, configurations, and other development-related details.

Security and Backup:

1. Implement security best practices to protect the website.
2. Set up regular backups and recovery processes using Elementor Pro.

Performance Monitoring:

1. Monitor website performance and make necessary adjustments for optimal speed and user experience.

Collaborate with Designers:

1. Work closely with graphic designers to bring their design concepts to life using Elementor.
2. Ensure that design elements are consistent and visually appealing.

Client Communication:

1. Communicate with clients to gather requirements, provide project updates, and address any questions or concerns.

Bachelor of Science in Information Technology

University Of Gujrat [17/10/2016 – 02/11/2020]

Address: Jalalpur Jattan Road, 50780 Gujrat (Pakistan)

Website: <https://www.uog.edu.pk/>

PROJECTS

Final Year Project

C-Chat (Conference Call Room Android Application)

Introduction:

We are living in the age of connectivity, and that means more things than ever before are right at your fingertips. With one press of the button, one swipe left or right, you can open up new worlds in seconds. We're talking about apps, those little icons on your mobile device.

Now a day's different mobile applications are providing the facility of texting, sending videos and audio messages, voice calls, video calls and group calls. Sometime you want to discuss on a professional topic and start a group call, but every member start shouting so you can't understand a single word.

In order to solve these issues, we are going to develop an app which will provide the group call facility with some extra features. There will be a group call organizer who will organize the call. Group call organizer will have authority to control the mics of call participants. Any participant who want to talk will press the buzzer to know the organizer that he/she want to talk, and admin will allow his/her mic.

Semester Projects

1. Bank Management System
2. School Management System
3. Online Buy & Sell Web Application
4. Mobile Application for Inventory Record
5. Puzzle Game in C#
6. Online Buy & Sell Desktop Application
