Results-driven Senior .NET Developer & Assistant IT Manager with 9+ years of experience in designing, developing, and deploying scalable web and enterprise applications. Expertise in .NET Core, .NET Framework, C#, ASP.NET MVC, ASP.NET Core, Angular, Web API, and MS SQL Server with hands-on experience in Azure Cloud, Entity Framework, and Microservices.

Proven ability to lead cross-functional teams, manage IT operations, and develop in-house applications that streamline business processes. Skilled in API integrations, Azure DevOps, database design, and troubleshooting complex technical issues. Successfully handled QCB IT audits and ensured compliance with regulatory standards.

Strong problem-solving skills, leadership, and experience in working with finance, healthcare, and money exchange domains. Adept in Agile methodologies, facilitating smooth collaboration between technical and non-technical stakeholders. Passionate about delivering high-quality, innovative solutions that drive business efficiency and growth.

SKILLS

Proficient in .NET Framework and .NET Core

C# Programming

ASP.NET MVC and ASP.NET Core

Web Technologies

Database Management

RESTful APIs
Version Control Systems

Software Development Lifecycle (SDLC)

AI-Assisted & Powered Software Development

Testing and Debugging

Leadership and Team Collaboration

Problem-Solving

Experience utilizing AI tools such as ChatGPT, GitHub Copilot, Gemini AI, and Claude AI for code generation, debugging, documentation, and optimizing software development workflows.

Continuous Learning

WORK EXPERIENCE

Assistant IT Manager : Application & IT Operations | 2023-2024
Al Jazeera Exchange Co I Doha,Qatar

- Collaborated with cross-functional teams to analyze, design, and implement application solutions that meet business needs.
- Assisted the IT Manager in overseeing daily operations and ensuring alignment with organizational goals and standards.
- Developed and maintained in-house applications to streamline processes and improve efficiency within the organization.
- Played a crucial role in handling QCB IT audits, ensuring compliance with regulatory requirements and internal policies.
- Prepared comprehensive audit documentation and reports, identifying areas for improvement and coordinating with stakeholders for remediation.
- Led troubleshooting efforts for application-related issues, working closely with vendors and internal teams to resolve incidents in a timely manner.
- Managed application updates and upgrades, ensuring minimal disruption to business operations and user productivity.
- Facilitated meetings and discussions with vendors and development teams to strategize and execute API integrations, ensuring seamless connectivity and data flow across applications.
- Monitored industry trends and best practices to recommend innovative solutions and improve existing application frameworks.
- Facilitated communication between technical teams and non-technical stakeholders, translating complex technical concepts into understandable terms.

Full Stack .Net Developer (.Net Core & Angular) | 2022-2023
Al Ahli Hospital (Mekdam Technical Service) I Doha,Qatar

- Developed web applications for Front Desk and Billing modules using .NET Core (6), Web API, Angular, Azure DevOps, and EF.
- Designed and implemented features to facilitate billing settings, including point of sale configuration, healthcare providers management, and physical location setup.
- Configured point of sale systems for assigned staff to efficiently register and bill for patient services, enhancing operational workflow.
- Integrated Canon Document Management System API to streamline document processing and improve data management.
- Collaborated with cross-functional teams to gather requirements and ensure alignment with business goals and user needs.

Software Engineer | 2018 - 2022

Al Yousuf Exchange & Money Transfer BSC C. l Manama,Bahrain

- Developed a Money Exchange and Transfer Software System utilizing WPF, WCF, DevExpress Controls, MS SQL Server, and Web API with JSON for data interchange.
- Gathered and analyzed new requirements based on daily operational processes, ensuring the system met evolving business needs.
- Enhanced the sub-inventory (point of sale) functionalities to accommodate customer requirements, improving user experience and satisfaction.
- Integrated SMS and iDetect API to bolster the system's capabilities and streamline communication processes.
- Created and maintained Web APIs and WCF Services to facilitate seamless integration with the iDetect System.
- Successfully integrated Transfast and Cash Express Money Transfer APIs, enabling efficient and secure money transfer operations within the software.

Software Engineer | 2018 - 2018

Muthoottu Mini Financiers Pvt Ltd l Kerala,India

- Developed Gold Loan Applications and Circular Management Systems using ASP.NET MVC, Web APIs, and AngularJS to streamline loan processing and document management.
- Managed database operations and optimizations using MS SQL Server, ensuring data integrity and performance.
- Collaborated with stakeholders to gather requirements and design user-friendly interfaces that enhance user experience.
- Implemented RESTful APIs for seamless integration with frontend applications, facilitating efficient data exchange and functionality.
- Conducted thorough testing and debugging of applications to ensure high quality and reliability before deployment

Software Engineer | 2015 - 2018

Datamate Infosolutions Pvt Ltd l Kerala,India

- Primarily focused on developing Health Care Applications using Mediware, contributing to the enhancement of healthcare service delivery through technology.
- Provided software engineering expertise throughout the software development lifecycle, from requirement definition to successful deployment of healthcare products.
- Collaborated with cross-functional teams to gather requirements, design solutions, and ensure alignment with healthcare industry standards and regulations.
- Facilitated system customization by promoting the adoption of emerging standards for software application development architecture and tools within the engineering team.
- Actively participated in code reviews and quality assurance processes, ensuring high standards of software quality and reliability.

Software Engineer | 2013 - 2015

TechBright Solutions Pvt Ltd l Kerala,India

- Developed Windows and web-based applications using C#, delivering robust solutions tailored to user needs.
- Contributed to the ongoing improvement of software development practices within the organization, promoting a culture of continuous learning and adaptation.
- Researched, designed, and implemented best-practice solutions to address emerging challenges and enhance application functionality.
- Primarily focused on money management systems and logistics applications, ensuring effective resource allocation and financial tracking.
- Involved in database management, optimizing database performance and ensuring data integrity to support application functionality.

CERTIFICATIONS

Azure Developer Course for AZ-204

Azure Administrator Course for AZ-104

Asp.net C# with MS Sql Server

Python using AI Workshop

ACADEMIC HISTORY

Anna University Chennai - India | 2011 -2014

Master of Computer Application (MCA)

TECHNICAL SKILLS

Operating System : Windows 11,10 ,8,7 & XP& Linux

AI Tools : ChatGPT, Copilot, Gemini AI, and Claude AI

Programming Languages : .Net Core , Asp.net , C# , VB.Net

Web Technologies : Angular, Java Script ,JQuery , HTML , Ajax, XML, CSS , Json , Bootstrap

Database : MS SQL Server , Oracle , PostgreSQL , Mongo DB , MySQL

Technologies : Asp.net MVC , Web API , Web Service , WPF , WCF , Linq

Connectivity : Ado.net , Entity Framework

Other Tools: Postman , Azure Devops ,Devexpress Controls , Soap UI

Version Control : Git, Azure Repos, SVN

Knowledge In : Microservices , React Js , Node Js , Phython

PROJECTS

eHope - Billing Application : .Net Core(6), Angular , Entity Framework , Web Api, Oracle,Azure Devops

Developed the eHope Billing Application to streamline outpatient billing processes within the hospital system. The application provides functionalities for creating lookups, managing patient records, and handling visits, enabling efficient billing for consultations and procedures.

Corex Money Exchange & Transfer System : WCF, WPF, Devexpress, Sql,Web API

Developed the Corex Money Exchange & Transfer System, enabling users to exchange currencies and send/receive money internationally. The application integrates real-time transactions with correspondent APIs, providing a seamless experience for users engaged in money transfer services.

Circular management System : Asp.net MVC , Web API , Angular JS,MS Sql Server

Developed the Circular Management System to facilitate the creation, submission, and maintenance of organizational circulars. This system streamlines communication and document management within the organization, ensuring that all circulars are efficiently tracked and maintained.

Gold Loan Application: Asp.net MVC , Web API , Angular JS,MS Sql Server

Developed a comprehensive Gold Loan Module for business and accounting processing in the financial sector. This project effectively manages the entire lifecycle of gold loans, enhancing operational efficiency and ensuring accurate financial tracking and reporting.

Mediware : Asp.net,Vb,Oracle,Jquery,Ajax,Web Service

Mediware Hospital Management System is an indigenously developed, comprehensive solution automating the core clinical, administrative and financial solutions, alongside other critical areas of a healthcare ecosystem. While the core clinical solutions of Mediware helped providers to deliver the best coordinated clinical care practices, the administrative and financial solutions streamlined the operational processes in place. By providing rapid information access enterprise-wide, Mediware Hospital software helps healthcare service providers deliver excellent patient care.

Management Information System(MIS)

Developed and integrated a Hospital Management Information System (HMIS) to support decision-making at the hospital management level. The system enabled timely and relevant data collection, essential for strategic and tactical decisions. It computerized management across various functional areas, such as outpatient departments (OPDs), admissions,Radiology,Pharmacy,Medical pharmacy, medical records, accounts and finance, human resource management (HRM), and administration.
This project contributed to efficient cost containment and quality improvement within the hospital by automating and streamlining processes in these departments, enhancing data accuracy, and improving operational efficiency.

PERSONAL INFO

Nationality : Indian   **Date of Birth :** 24-May-1990   **Gender :** Male   **QID :** 29035651343   **Language known :** English, Malayalam , Tamil

DECLARATION

I declare that the information furnished above is true and correct to the best of my knowledge.
